oneearthfilmfest.org/films-by-date

To host a virtual or in-person watch party for your congregation or community group, please contact venues@oneearthcollective.org

Questions? Contact Dick Alton, Chair, NIC Eco-Sustainability Task Force

More about the movies

My Octopus Teacher: This Oscar-winning film follows Craig Foster as he begins a daily diving regimen in the freezing kelp forests of South Africa. What he discovers below the water's surface is a totally alien motivation in the form of an unusually curious octopus. This film paints an immersive portrait of human-animal understanding. *Recommended for general audiences; appropriate for ages 8+.*

The Sacrifice Zone: Life in an Industrial Wasteland
The Ironbound district of Newark, New Jersey, is one of the most toxic neighborhoods in the country. Maria Lopez-Nuñez, a Honduran-American resident there, is waging war for environmental justice.

On the Fenceline: A Fight for Clean Air is an urgent call for justice for Philadelphia's low-income communities. Residents have come together to stand up to CEOs and fight for their right to breathe.

Inhabitants: Inhabitants follows five Native American Tribes as they restore their relationships to the land using ancient practices that nurture life. As the climate crisis escalates, these time-tested practices of North America's original inhabitants are becoming increasingly essential in a rapidly changing world.
